

DAR AL AAYAN CONTRACTING LLC

Performance
without Compromise

ABOUT US

DAR GROUP is a renowned contracting Group of Companies specialized in construction of Residential, Commercial and Industrial Buildings, Roads, Bridges and Infrastructure with a successful history spanning over six long years. We have been successfully developing some of the landmark projects in GCC & Pakistan, with its strong focus on new concepts and modern building technology, the group has introduced flexibility and efficiency in building its prestigious projects. We offer exceptional value to our clients, remains unfazed by the complexity, scale and vastness of any project awarded to it. The group also overcomes challenges arising from the size or complexity in different phases of implementation from design to the final stage of completion.

Excellence at every stage

Mission

Our mission, apart from customer satisfaction, is to expand the presence of the group beyond GCC and Pakistan. Dar Al Aayan Contracting LLC also aims at ensuring complete safety of its employees, without any compromise.

We are committed to delivering excellence through innovation, integrity, and teamwork. Our focus remains on building long-term relationships with clients by consistently exceeding expectations and maintaining the highest standards of quality and safety across all projects.

Vision

Our vision is the construction of residential, commercial buildings and villas on turnkey basis in GCC and Pakistan on par with world-class standards by introducing innovative and inspiring ideas, which can create a lasting impression. The values that constitute the company's vision include professionalism, integrity, durability, reliability, safety, quality workmanship, teamwork and customer satisfaction.

- **Trading of Plastic Re-grinded Material (LDPE, HDPE, PP, PET, PS, ABS & ROTO)**
- **Trading of Electrical and Building Materials**
- **Car Rental**

01-QUALITY

Our core strength lies in paying attention to detail and in ensuring the quality of pre- construction and services. We also believes that the quality aspect of construction industry is often utmost importance. In fact, it is as important as the construction of the structure itself. The company always coordinates with the clients, architects and engineering consultants to review the drawings and specifications in a forward looking manner in an apparent move to get maximum value on investment within the estimated budget. The quality process, which is popularly known as 'value engineering leads to a collaborative approach, a better coordinated effort to build an easily maintainable project.

02-QHSE

As per the directives of ISO 9001:2008, 14001 & OHSAS 18001, we are continuously improving our integrated management system to reflect customer, corporate and regulatory requirements. We runs a health and safety programme as part of its management plan to enhance the overall quality of workforce for our employees. We also hold environmental awareness and protection programmes as part of our commitment to the environment.

03-Growth

To strengthen our growth, we are seeking to develop long-term partnerships with our clients in construction industry with quality work and timily completion of projects.

Speed & Flexibility

DAR GROUP is known for fast track delivery of projects. Our fast track system enable us to save on time required for procuring vital materials, with the organisation's expertise allowing to continuously save a considerable amount of time in delivery schedule. This helps the clients against problems associated with unexpected delays as well as other challenges.

Safety

We have created a comprehensive safety program me for its workforce in line with its belief that employees are the greatest and most valuable assets of the company. The company, which do not compromise on safety, has ensured a safe working environment. As the company takes safety seriously, the management considers accident prevention as a key area in different phases of construction. In fact, the company is committed to the highest safety standards, which are in line with sound construction practices. Our safety professionals have in-depth knowledge and experience and they are continuously updated on latest global regulations and safe work practices in the construction industry. The company has achieved effectiveness of its safety program me, which is well above the industry average.

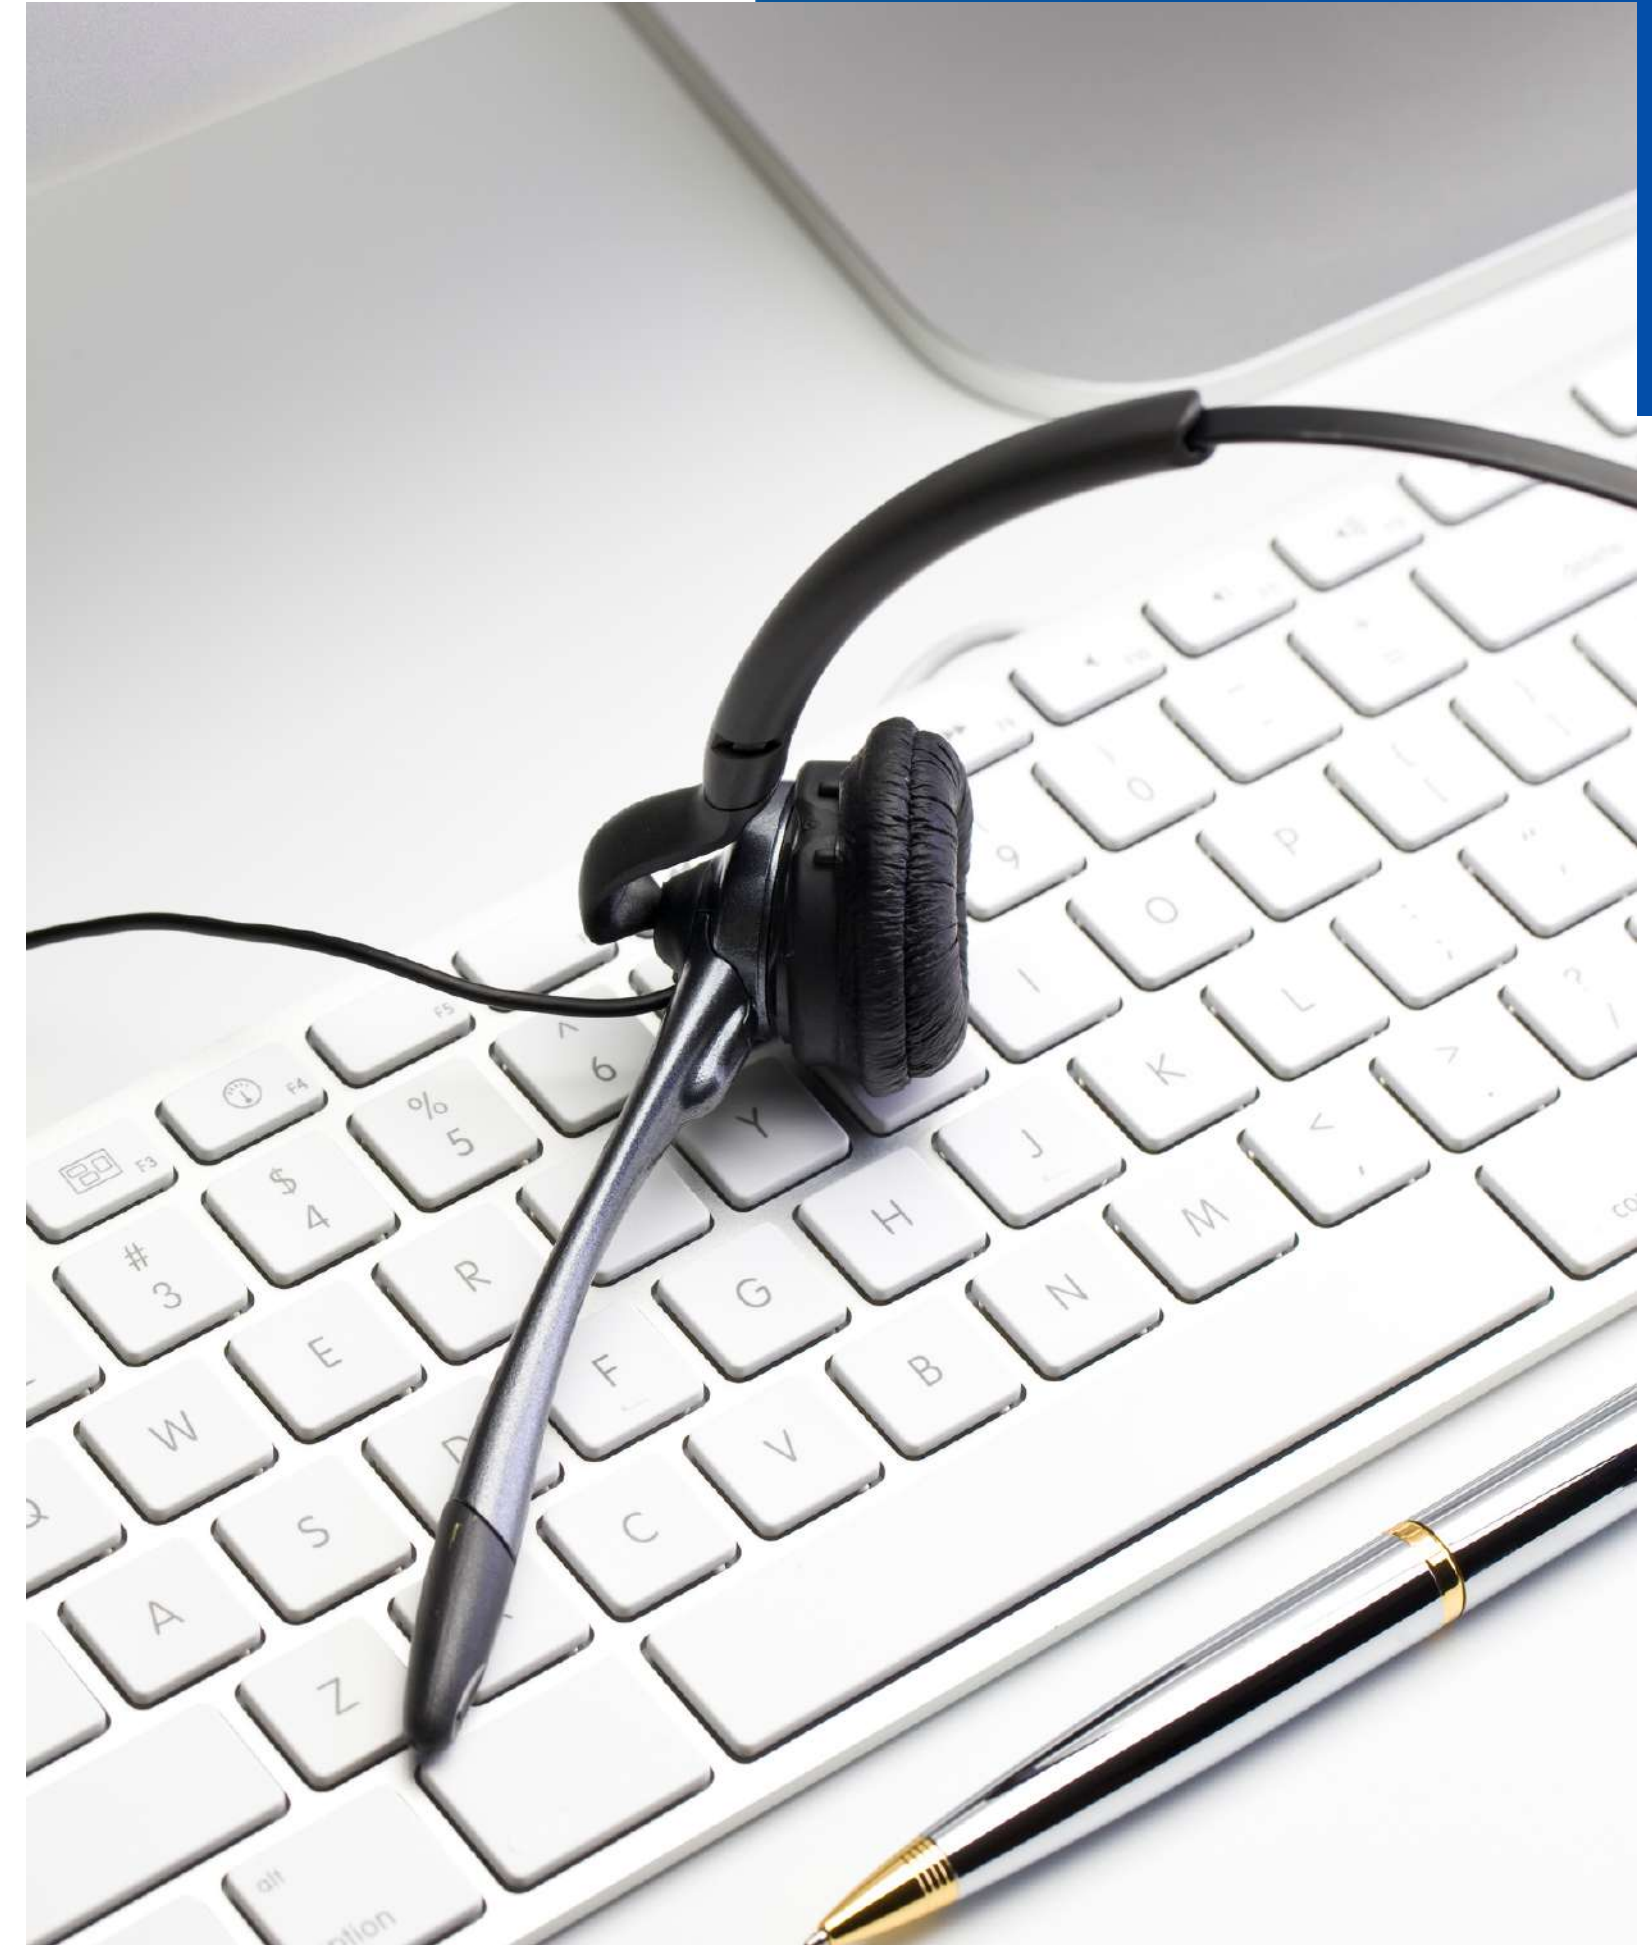

Where Exceptional Service Meets Valuable Resources

Customer Service

We have expertise in design, engineering, project management and construction. These are the disciplines that provide value for our clients in the long run. Over the years, our commitment to customer service, which is the prime focus, remained unchanged. In other words, we are committed to listen to the ideas of our customers and respond quickly to their specific needs. We build relationships that are purely based on the foundation of trust and service, which resulted in a long history of tremendous success.

Client satisfaction is the most important criteria for taking any decision, whether in the office or at work site. With this principle as a guiding force and a focus on an efficient work habit, the company carries out its work in the most successful manner.

Dar Al Aayan Contracting LLC builds relationships that exceed expectations, which is the corporate philosophy as well as the way of doing business. Our employees believe that the company's success solely depends on the success of its clients.

Where Exceptional Service Meets Valuable Resources

Resources

We have a team of technical and management professionals, having rich experience in project management and controls, enabling the company to achieve its targets by applying professional approach and handling site work execution and contract management.

Our personnel management division is responsible for planning human resource, which include Employment, Placement, Retention, Evaluation, Training, Safety and Compliance. In line with the company's policy on reliability, we own and operate a comprehensive fleet of heavy construction equipment. Our professionals are well-experienced in dealing with sophisticated equipment and machineries, including cranes, bulldozers, shovels, rollers, trucks, trailers, backhoes, finishers, graders, laser road profilers and falling weight deflectometer. All equipment are periodically maintained and routinely checked on a rotational basis to ensure optimum running performance with minimum downtime.

Construction

This department is responsible for the construction of Roads, Bridges, and Buildings procurement and installation. We handle all types of turn-key construction projects with ease, thanks to our large pool of experienced technical staff.

Estimation & Tendering

This division deals with estimating cost of materials, machinery and manpower. Besides, the department is responsible for preparation and submission of tenders, identifies and tries to win projects in coordination with the business development department and tender committee.

Inventory & Stores

This division keeps a track of the budget, list of vendors and data for each item that is routinely needed. This section records and processes all aspects of a typical purchase operation for the government and private sector projects. We keep a track on the project budget and expenditure under each budget item, provided by the establishment. In addition, the division records and processes all aspects.

Logistics

Our logistics department plays a critical role in ensuring the smooth flow of operations by negotiating and managing contracts with third-party suppliers. This includes sourcing, procuring, and securing all necessary resources whether materials, equipment, or services that are vital to the successful execution of our projects. Through effective contract management and strategic partnerships, we ensure the best value, timely delivery, and high-quality standards, all of which contribute to the overall efficiency and success of our operations.

Production

Our production department has expertise in executing projects with efficiency, that too within the stipulated timeframe and with a focus on quality in each and every step. From the very choice of materials to suit a work, our experts are available to advise clients to ensure perfection in quality and standards.

Plant & Production

We consider each project as 'one of a kind' venture. We learn something new while executing each project and apply new lessons learnt from each project in the future works. This accumulated knowledge and expertise are the cornerstone of our reputation as a quality contractor.

Our fleet of more than 41 trucks and light vehicles and 55 heavy equipment, which include bulldozers, wheel loaders, excavators, heavy rollers, cranes, milling machines, pumps, asphalt plants, road base stabilizers and graders, available for execution of all kinds construction projects. In support of plant and machinery, we have our own extensive plant and workshop facilities.

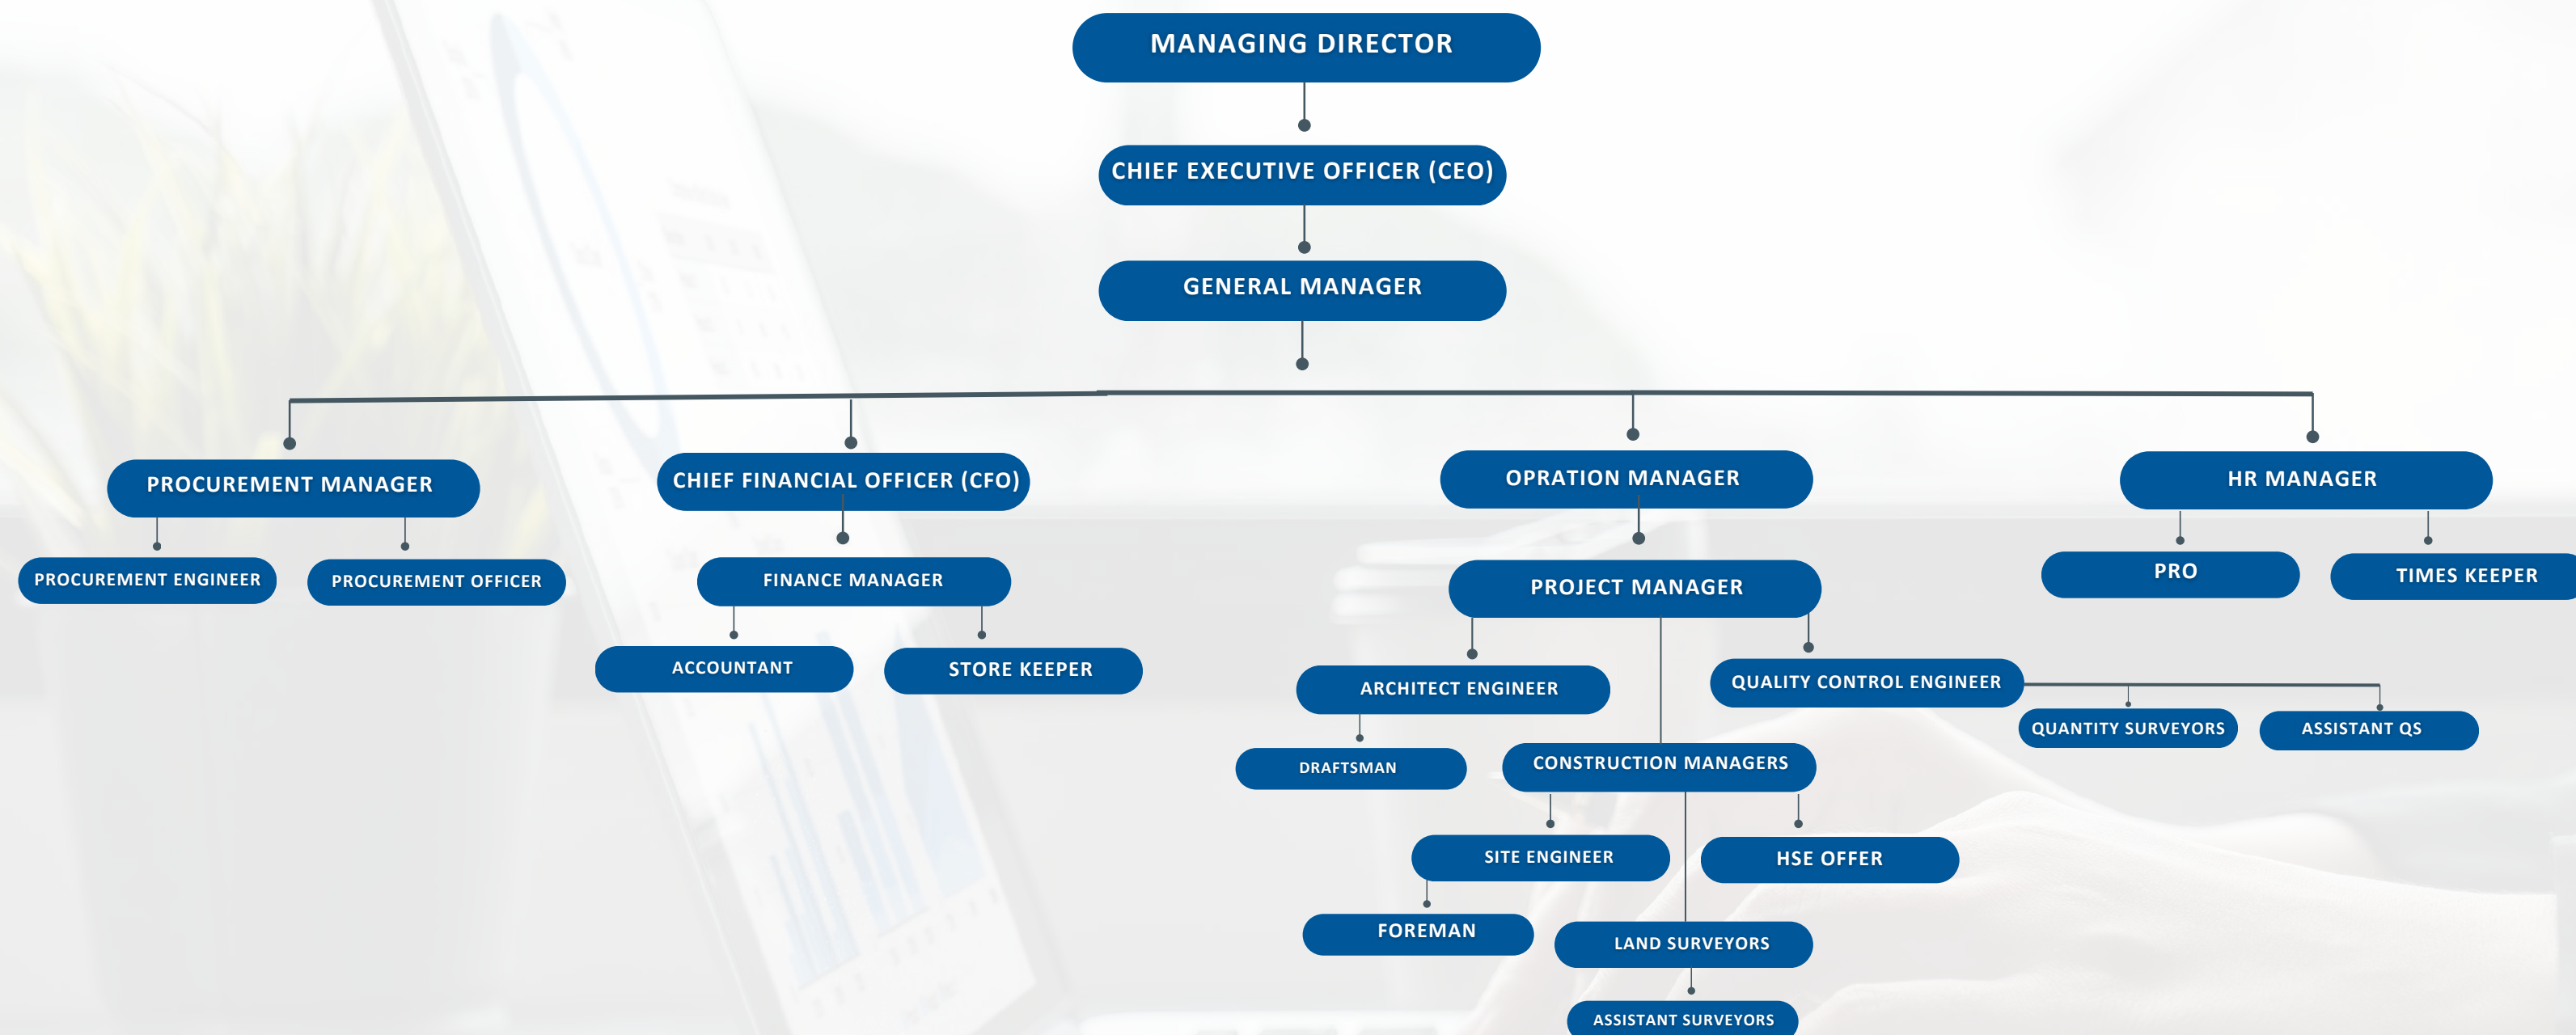

The facilities are capable of servicing and maintaining the fleet of plant and equipment to the highest standards. The workshop include engine repair shops, spray paint shop & stores. To meet the project requirements our transport department maintains healthy relations with suppliers to hire and mobilize additional equipment and machinery.

At DAR GROUP, we have realised that an organisation's reputation depends on dedication of its employees. Each employee at every level from bottom to top is fully dedicated for the client, while the entire team focuses on resolving challenges and obstacles to exceed the expectation of clients.
